

ALMA MATER

Praise to Thee, Our Upper Merion!
Fairest School, so dear to me;
Bless thy Sons and bless thy Daughters!
Make us ever proud of Thee!

Praise to Thee, Our Upper Merion!
Make us loyal, strong and true!
Let's remember our traditions;
Alma Mater praise to thee!

Swedesburg, Bridgeport, R. D. 1

"Shrimpy" has the handy knack of being able to see a silver lining through a thick coat of school work with the aid of a little day-dreaming. But he does make it a point to have his English done on time. Shrimpy is well known in various activities about the school, such as wrestling, tennis and football

Wrestling 3, 4; Glee Club 1, 2.

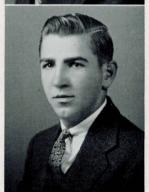

ALFRED JOSEPH ZIELINSKI

Business

Śwedesburg, Bridgeport, R. D. 1

"Whitey" participates in most every sport at Upper Merion. He is active in all the entertainments that are given in the school. His popularity at parties is gained by his dancing ability as he is one of the best dancers of our class. When we want to find "Whitey" we usually look for "Rickey". These two regulars are inseparable.

Football 1, 2, 3, 4; Basketball 1, 2, 3, 4; Baseball 4.

BENNY ANTHONY ZUGAY

Business

Swedeland

Benny is a quiet modest fellow. He shows his unusual athletic ability in baseball and basketball. Pitching a no-hit no-run game is just one of his accomplishments. Being an athlete does not keep Benny from doing good school work. He is an all around fellow liked by everyone.

Baseball 3, 4; Basketball 1, 3, 4; Glee Club 1.

AS WE LEAVE

MR. LLOYD A. MOLL Superintendent of Schools Franklin and Marshall College, A. B. University of Pennsylvania, M. A.

Superintendent's Message

We are told by our jewelers that each wheel in a well regulated watch comes to a complete stop four hundred thirty-two thousand times each day. Yet the mechanical precision which makes possible an accurate measurement of time through this series of intricately interlocked movements we accept as ordinary fact. We sell it as a common commodity across our bargain counters. We have borne witness to greater achievements. So extended is our knowledge of things mechanical that a schoolboy could trace the flow of energy from the main spring to the balance wheel, and understand why it works.

Our skill in human relationships is less advanced. Our failures in getting along with our fellowmen are oftentimes more obvious than our successes. The picture as drawn has a discouraging influence upon us. The idealistic youth that left our high schools a generation ago met disillusionment upon disillusionment in rapid order. Fear seems to be the dominant emotional tone of these latter years.

On the other hand, progress has been made. Events have shaped you into a more realistic group as you undertake your tasks in our community. The likelihood of your success is increased by this. It is our hope in America that your generation may develop an understanding in human affairs which shall become as common a possession as is our understanding of things mechanical today. And it is our further hope that you may have high courage for the undertaking.

-Lloyd A. Moll.

MR. ROBERT R. STRINE
Principal of the Jr.-Sr. High School
Ursinus College, B. S.
Bucknell University, M. S.

Principal's Message

Dear Seniors:-

As you bring to a close your last year at Upper Merion, I want to wish you much happiness and success in whatever fields of endeavor may interest you. I want also to say that I feel you have really made Upper Merion your school. You have contributed a great deal through your leadership and your ability to cooperate and your ability to command cooperation from your fellow schoolmates. This fine example approximates an ideal which following classes may try to achieve. I am sure they will accept this challenge and, as you leave us, let us challenge you to do the same good in your life after Upper Merion, that you began while students here at Upper Merion.

Sincerely,

Robert R. Strine
